

Tidbits from Campmasters

1. Moving a Scout's Account to the Correct Unit in the Popcorn System - 08212026

The change to automatically remove a Scout from their old unit when registering for a new one is now live. When a Scout attempts to register for a new unit on the scout registration screen, they will now be presented with the following two options:

Selecting **“Register for a new unit”** will allow them to enter their new unit number. Once registration is completed (Scout-Registration Email), the Scout will automatically be removed from their previous unit and moved to the new unit.

If you create a Scout in a new unit using the same **First Name / Last Name / Email** as an existing Scout, the system will automatically remove them from their old unit and place them in the new one.
